U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05) Application/Control Number: 10/695,032

Art Unit: 3724

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112: 1.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The addition of the phrase "flat back" to the specification, abstract, and claims is considered new matter. Using the provided Figures, the back of each blade is clearly curved and is not flat.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steffens (4,930,709) in view of Sontheimer (4,200,244) and Ehrle et al. (5,996,917). In regards to claim 1, Steffens discloses the invention including three arcuate blades (A, B, and C) mounted to a central shaft peripherally (9), the blades are separately attached to the shaft at different height levels (Fig. 2) and distributed in equiangular positions (Fig. 1

BEST AVAIL DIE COPY

Art Unit: 3724

and Column 2 lines 64-66), a convex side of each blade is formed with a arc-shaped (2), and each arc-shaped knife edge has a flat back side and a tail end that form an included angle (Fig. 3)

However Steffens fails to disclose a convex side of each blade is formed with a serrate knife edge, the three included angles of each blade is different, and the three arc-shaped knife edges have different curvatures.

Sontheimer teaches a convex side of each blade is formed with a serrate knife edge (64). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Steffens with a serrate knife edge, as taught by Sontheimer, to allow for a more efficient cutting means.

Ehrle et al. discloses that it is old and well known to incorporate different shaped blades incorporating different included angles and arced curvatures (Fig. 4). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Steffens with different shaped blades, as taught by Ehrle et al., to allow for a more efficient cutting means.

In regards to claim 2, the modified Steffens reference discloses each blade is attached to the central shaft horizontally (Fig. 2).

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are 5. moot in view of the new ground(s) of rejection.

Conclusion

Application/Control Number: 10/695,032

Art Unit: 3724

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Steffens (`590), Seydelmann, Hotimsky, Torp, and Sinovas et al.

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is (571) 272-4513. The examiner can normally be reached on 7:30-5:00, Mon - (every other) Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on (571) 272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.
